ASBESTOS MANAGEMENT PROGRAM

Dear Parents, Guardians, Students, Staff and Faculty,

- Asbestos Management Plans are updated annually and copies maintained in the office of each building administrator for review. Additional copies are also located in the Facilities Planning and Construction Services Department.
- Routine inspections are conducted as well as tri-annual re-inspections of all facilities.
- Operations and maintenance procedures are implemented to ensure no building has asbestos-containing material that poses a health threat to teachers, students, staff, or patrons.
- It is a part of the district's on-going effort to renovate and remodel existing facilities.
- Numerous renovations and additions have been completed which involved abatement of asbestos-containing material prior to the general construction. In many of these buildings, the only asbestos material remaining is inaccessible until such time as the building is to be renovated, and then it will be safely removed prior to the renovation.

Following is a list of GISD facilities that are known to have some building materials containing asbestos:

PROGRAMA DE MANEJO DEL ASBESTO

Estimados Padres, Tutores, Estudiantes, Personal y Facultad,

- Los planes de manejo de asbesto se actualizan anualmente y se mantienen copias en la oficina de cada administrador del edificio para su revisión. También hay copias adicionales en el Departamento de Servicios de Construcción y Planificación de Instalaciones.
- Se realizan inspecciones de rutina, así como reinspecciones trianuales de todas las instalaciones.
- Se implementan procedimientos de operación y mantenimiento para asegurar que ningún edificio tenga material que contenga asbesto que represente una amenaza para la salud de los maestros, estudiantes, personal o patrocinadores.
- Es parte del esfuerzo continuo del distrito para renovar y remodelar las instalaciones existentes.
- Se han completado numerosas renovaciones y adiciones que involucraron la eliminación de material que contiene asbesto antes de la construcción general. En muchos de estos edificios, el único material de amianto que queda es inaccesible hasta el momento en que se va a renovar el edificio, y luego se retirará de forma segura antes de la renovación.

A continuación, figura una lista de instalaciones de GISD que se sabe tienen algunos materiales de construcción que contienen asbesto:
