1	We noticed that this is a "Rebid" RFP. Can you please share some context about what happened when the RFP was first released? If we can get an understanding about the challenges faced in the first release of the RFP, it will give us a more comprehensive insight to the project.	There are some provisions and requirements more clearly defined in the rebid RFP. The document, 221-21-01, should be considered the complete RFP document to be reviewed for the supplier's response.
2	Can you share any budgetary information about this project with us, is there any assigned budget for this project? Please specified the budget.	Anticipated budget is less than $75,000.
3	The current organization that is currently under contract with you for the support of the current website, will participate on this new bid process? If you are looking to change providers, what are the driving factors for the change?	We will not know which suppliers intend to participate until the responses are received. The current contract is set to expire at the end of this term, the reason for the new RFP process.
4	Do you have any CMS preference for this project like Open Source, WordPress, Drupal, or proprietary?	We prefer a proprietary solution specifically geared towards school websites. We need a CMS that will fulfill our requirements right out of the box without any need for additional development time (other than design), which is not likely with an open source solution.
5	Do you expect vendor to create content for the websites?	No
6	How many visits has the current site per month?	In the past year we had an average of 245,202 page views and 199,996 unique page views per month.
