Question 1:

Additional Functionality: Is Garland ISD interested in additional functionality (included unless otherwise noted) such as:

Ability to alter flow -

After rules are run to control whether or not to deliver email, Delivery Policy Rules control what happens to an email after it has already decided to accept it. Examples of things you can do are:

- Add custom headers to a message.
- Add additional Bcc recipients.
- Redirect the message to a different recipient.
- Add a subject tag.

For instance, an email comes in from a parent but it contains a social security number. Rather than go to the teacher it is sent to it can be redirected, copied, tagged/subject like added [Private Information Contained], ... to a more appropriate person to handle that SSN.

Response 1:

Yes, this would be considered.
